What's New in WPF/SL?

telerik
deliver more than expected

EQATEC Application Analytics

- Simple way to monitor applications at run-time.
- Will capture crash reports and exceptions at run-time.
- Will tell you which features from your app are used the most.
- Gathers information about the end user's system automatically
- Not all XAML controls and features have been integrated with EQATEC.

Costs?

- Free for one app.
- For more analytics power:
  - Buy it separately from http://www.telerik.com/analytics/purchase
  - Upgrade to DevCraft Ultimate, which will include one EQATEC license as of November
- For more info: www.telerik.com/analytics

Coded UI Test Level 2 and 3 - WPF

- Level 2: Rich Property Validation
- Level 3: Code Generation

Office 2013 Theme

- Mimics the look and feel of Microsoft Office 2013.

Office 2013 Theme - White
