

How to make the most of the TeamPulse personal demo?

Meet the TeamPulse Solutions Consultants Team

PETAR GRIGOROV
Agile Solutions Consultant

RAMIRO MILLAN
Agile Solutions Consultant

*Call us your
WINGMEN*

If you are trialing TeamPulse or plan to in the near future please remember the great the resources you have at your disposal. Not only do you have a library of how to videos and knowledge base articles but we've assembled a team of solution consultants to assist you getting to learn TeamPulse. These consultants intimately understand the product, organizational structure and methodologies so they are a great resource to use during your evaluation of TeamPulse. A great way to begin any evaluation is with a one on one session with one of our consultants, this will ensure that you start off on the right foot. They are also available to assist you set-up and configure TeamPulse if needed.

Below we've compiled a list of question that you should ask our consultants during the one-on-one consultation to help better understand how TeamPulse can help with your goals.

Questions to ask your Wingman during your one-on-one consultation

The purpose of the one on one consultation is to get you and your team's evaluation off in the right direction. We've created a list of questions to help you get the most out of the session.

QUESTIONS TO ASK	WHY IT'S IMPORTANT
What are the system requirements?	It's important to know what you will need from a hardware perspective in case you need make a request to IT teams.
Do I have to change my established process if I am adopting a tool?	Ensuring the tool you adopt can adapt to the many facets of your organizations is important. It will also allow our consultant to demonstrate how your process will work within the tool.
How do I communicate with external stakeholders?	Understanding how information will flow in and out between teams and stakeholders is critical to the overall project health.
How can I make sure that all my team members are using the tool consistently?	To get a full return on your investment in a project management tool it is important to make sure that your whole team is using it.
How can I adhere to any best practices?	Adhering to best practices will ensure that you stay on track and take quick action to fix any problems early on
Can I track the status of multiple projects?	When working on multiple projects, having a unified cross-project perspective is very important.
Do you have available API?	When your company is using multiple systems it is important to be able to integrate those systems.
Can I customize the tool and its extensions?	It's important that a tool supports your team's own process or if you have many teams each with different processes thus allowing them to continue to do what they do best.
Do you support Kanban?	Using Kanban you can easily visualize and eliminate bottlenecks and have a lean approach.
Can we continue to use our Team Foundation Server work items to track our work?	If your development teams are used to working with Team Foundation Server and driving process through work items your solutions should be able to support those work items to ensure teams stay synched about the progress.
Can I integrate TeamPulse with Telerik products?	If you own Telerik Test Studio you can take advantage of the integration feature and use both tools as a bug tracking and testing solution.
