

# TeamPulse Online Training

## GOAL

Provide attendees with the fundamental skills necessary to begin managing your application development projects with Telerik TeamPulse

Attendees will complete the training with a basic understanding of all of the major features of TeamPulse, with the focus being on how TeamPulse will be used to help manage the flow of requirements; from inception, through design, construction and finally quality assurance.

## Major Topics

- Elicitation via user feedback
- Agile planning
- Requirement management
- Quality assurance
- Tracking your progress

## Targeted Participants:

Team Members, Developers, Testers, Technical Leads, Project Managers, Business Analysts

## AGENDA

### Session 1

#### Introduction to Team Pulse

- Project creation and management
