What's new in Telerik Reporting

Brand New Charting Engine

- Completely new – built from the ground up
- Easier to work with and set up
- Uses same OLAP Engine as Crosstab Report Item
  - Works with thousands of data points very quickly
  - No need to bind it separately
- Design time rendering of Live data

Additional Features

- Flexible architecture
- Simplified styling using pallets
- Expression support
- Native rendering of HTML5/PDF/XAML
- 10x performance over previous version
- 3x reduced memory usage

Included Chart Types

- Scatter/Bubble
- Polar
- Column
- Bar
- Area
- Line

- Pie/Doughnut
- Rose
- Sparkline

- Combination
  - All chart types can be combined

Demos – Telerik Reporting

Multiple Diagrams Support

- Wizard – split by schema
- Easily move items around
  - Copy/Move to another diagram
  - Include Related/Hierarchy
- Locate in Diagram

- Adds to already supported:
  - WCF
  - WCF OData v3
  - WCF OData v1
  - RESTful collection Service
  - AtomPub Service

Stream Content from Database

- BinaryStream Type (r/w)
  - Used for varbinary database types
  - Derives from Stream
  - Works with Oracle, SQL Server,

OpenAccess SDK Renamed...

- OpenAccess Samples Kit
  - Because it's full of samples ☺
- Many more samples added for this release
  - KendoUI
  - MVVM for WPF
  - Data Annotations in ASP.NET MVC

Remember…

- OpenAccess for all your data needs
- Telerik Reporting for all of your reporting needs

- Telerik Reporting and OpenAccess are the data foundation of DevCraft!
  - Web/Client/etc…

The DevCraft Collection

- Packed with 11 great products, including:
  - Telerik Reporting
  - OpenAccess ORM
  - ASP.NET Ajax
- Priced less than just two products together
