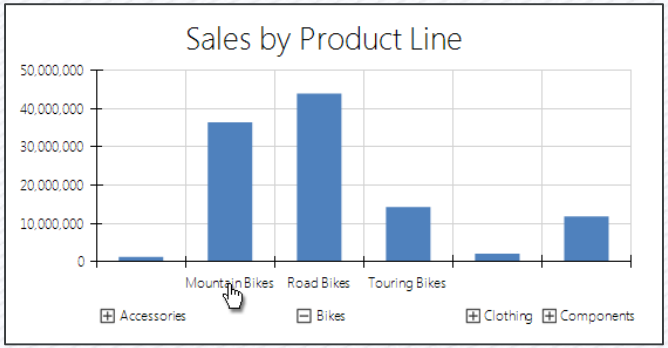
Graph Item Interactivity



- Add actions to grouped dimensions
  - Expand/collapse categories
  - Open a subreport
  - Toggle visibility of a report item
  - Link to a web page
  - Jump to another report section
- Same experience as adding actions to a crosstab

Improved Update Database from Model

Bulk Operations

```
context.GetAll<Car>()
       .Where(c => c.CarYear < 2000)
       .UpdateAll(u =>
u.Set(c => c.Category, c => tooOldCategory)
 .Set(c => c.Available, c => false)
 .Set(c => c.TagNumber, c => c.TagNumber +
" Old Reg"));
```

Update & **D**elete many entities with a LINQ-style Context API

Retrieval - **not necessary**
SQL - **not necessary**

Only with OpenAccess ORM
