

Year of manufacture: Typ : **KAF**
Order-No.:

Technical Data:

Top
Height of 1. level: **mm**
top storage level: **mm**

**maximum load*
on cantilever (one-sided):**

cantilever length (mm)	cantilever profile	cantilever load (kg)

load per support side: kg

rack height: mm

* The load data apply only for
uniformly distributed load.
When changing the operating
instructions must be followed!

- Conduct regular inspections.
- Notice operating instructions
- Are the loads within the authorised safety limits?
- Check for accidental damage and displacement of structural components.

Please report all damage to the
company safety officer!

Modifications to the construction
may only be executed after
consultation and approval by the
manufacturer.

Do not climb racking!

The operation and maintenance of
the storage equipment has to be
carried out according to the
EN 15635 - Steel static storage
systems.

If in doubt always contact
manufacturer!
