

# RadEditor for ASP.NET AJAX

**RadEditor** is not simply an HTML1 Editor. It is what Microsoft chose to use in **MSDN**, **CodePlex**, **TechNet**, **MCMS** and even as an alternative to the default editor in [SharePoint](#). Whether you need a mere Textbox with Google-like spellchecker, or a Word-like content authoring environment, the result is the same: clean **XHTML** output, fast rendering, widest cross-browser support, and [tons of features](#):

- *Out-of-the-box XHTML-enabled Output...*
- *Unmatched Loading Speed and Performance*
- *Microsoft Word-like Spell-checking*
- *Seven Ways for Pasting from Word*
- *Multilevel Undo/Redo with Action Trails*
- *Extended Functionality Through Integrated Controls*

Browser/OS	Windows	Mac OS	Linux
Internet Explorer	6.0+	-	-
Firefox	1.5+	1.5+	1.5+
Google Chrome	0.2+	5.0+	5.0+
Opera	9.0+	9.0+	-
Safari	3.0+	3.0+	-
