

Click on „Edit“ in row with „Order ID = 1“

	Order ID	Freight	Ship Name	Ship City	Team Names
BEARBEITEN	1	10	ShipName 1	ShipCity 1	

Fill a value in the field “Contact Name” (without this the grid do not send data to the controller)

Bearbeiten

OrderId: 1.00

Contact Name: aaa (Change something here, to send data)

Team:

ABBRECHEN AKTUALISIEREN

In Visual Studio there is a Collection with one element with the value null

```
[HttpPost]
0 references | 0 changes | 0 authors, 0 changes
public ActionResult Orders_Update([DataSourceRequest]DataSourceRequest request, OrderViewModel data)
{
    if (data != null && ModelState.IsValid)
    {
        // Update
    }
}
```

Locals

Name	Value
this	{TelerikMvcMultiSelectText.Controllers.GridController}
request	{Kendo.Mvc.UI.DataSourceRequest}
data	{TelerikMvcMultiSelectText.Models.OrderViewModel}
ContactName	"aaa"
CustomerID	null
EmployeeID	null
Freight	10
OrderID	1
ShipAddress	null
ShipCity	"ShipCity 1"
ShipCountry	null
ShipName	"ShipName 1"
Team	Count = 1
[0]	null
Raw View	
TeamNames	'data.TeamNames' threw an exception of type 'System.NullReferenceException'

I tested this with Internet Explorer 11 and Firefox 45.0
